

Collision Rug

Collision, a rug inspired by the collision of two geometric shapes. Versatile and fun design to bring light and color to all types of interiors.

Introducing Collision, the new 2023 collection born from the collaboration of Benditas studio with Barcelona Rugs, sister brand of Cumellas.

Benditas is a design studio led by Cateriana Vianna and Ferran Gesa, founded in 2019 in Barcelona, they work within the fields of product design, art direction and design strategy.

Barcelona Rugs since its start in 2014, collaborates with designers and artists to make handmade design rugs with high quality materials, betting on craftsmanship and all that this entails in terms of sustainability and concern for the environment.

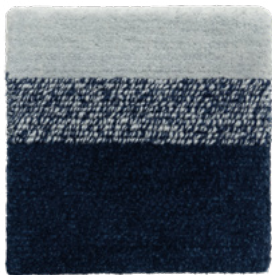

Collision is the result of that partnership, a rug collection inspired by the union of two geometric shapes. The objective is to create a fun and versatile design through the play of the two shapes delimited by colors and textures. The mix of colors in the center of the rug comes from the union of the two colliding shapes, also creating a change of texture in the center.

Collision works on its own or in the company of any of its colors. Thanks to its versatility, it invites you to imagine new spaces by combining and playing with the different designs. Collision can be the most prominent element or the companion of other objects in a space. The rug could be placed in both residential and contract spaces, bringing color and originality.

Collision is a hand-knotted rug made in merino wool. It comes in 6 different colors, blue, mustard blue, aubergine, rust, terracotta and rose. Carbon footprint for Collision rug is 75,4 kg CO²/m².

Material merino wool
Hand knotted in India
